```javascript
//1.动态创建select
function createSelect(){
    var mySelect = document.createElement("select");
    mySelect.id = "mySelect";
    document.body.appendChild(mySelect);
}

//2.添加选项option
function addOption(){
    //根据id查找对象，
    var obj=document.getElementById('mySelect');
    //添加一个选项
    obj.add(new Option("文本","值"));      //方法一：
    obj.options.add(new Option("text","value")); //方法二：
    for(var i=0;i<10;i++){
        obj.options[i]=new Option("新文本","新值");      //方法三：
    }
}

//3.删除所有选项option
function removeAll(){
    var obj=document.getElementById('mySelect');
    obj.options.length=0;
}

//4.删除一个选项option
function removeOne(){
    var obj=document.getElementById('mySelect');
    var index=obj.selectedIndex;      //index,要删除选项的序号
    obj.options.remove(index);
}

//5.获得选项option的值
var obj=document.getElementById('mySelect');
var index=obj.selectedIndex;        //序号，取当前选中选项的序号
```

```
var val = obj.options[index].value;
```

//6.获得选项option的文本
```
var obj=document.getElementById('mySelect');
var index=obj.selectedIndex;
var val = obj.options[index].text;
```

//7.修改选项option
```
var obj=document.getElementById('mySelect');
var index=obj.selectedIndex;
var val = obj.options[index]=new Option("新文本","新值");
```

//8.删除select
```
function removeSelect(){
    var mySelect = document.getElementById("mySelect");
    mySelect.parentNode.removeChild(mySelect);
}
```
