当我们在安装以一些依赖的时候会提示以下报错---------

```
npm ERR! code ENOSELF
npm ERR! Refusing to install package with name "webpack" under a package
npm ERR! also called "webpack". Did you name your project the same
npm ERR! as the dependency you're installing?
npm ERR!
npm ERR! For more information, see:
npm ERR!     <https://docs.npmjs.com/cli/install#limitations-of-npms-install-algorithm>

npm ERR! A complete log of this run can be found in:
npm ERR!     C:\Users\admin\AppData\Roaming\npm-cache\_logs\2018-11-25T11_50_35_115Z-debug.log
```

问题出在：

```json
{
  "name": "webpack1",
  "version": "1.0.0",
  "description": "",
  "main": "webpack.config.js",
  "dependencies": {
    "jquery": "^3.3.1",
    "webpack": "^4.26.0"
  },
  "devDependencies": {
    "webpack-dev-server": "^3.1.10"
  },
  "scripts": {
    "test": "echo \"Error: no test specified\" && exit 1",
    "dev": "webpack-dev-server"
```

这个name 不能使用所需要安装包的名字！

解决方案----- 修改下就行 -- -我将wenpack 改成webpack1 就解决了这个问题----
